

DDAP-RAX

DDAP-RAX

DDAP-RAX is a machine-building company from Ukraine producing railway axles for wagons, locomotives, diesel and electric locomotives, underground railway, as well as for in-plant transport from purchased section blanks.

The company has been on the market for over 30 years and is the largest specialized company in Ukraine in the field of machining railway axles. Over the years, the company has produced more than 1.5 million axles of various types.

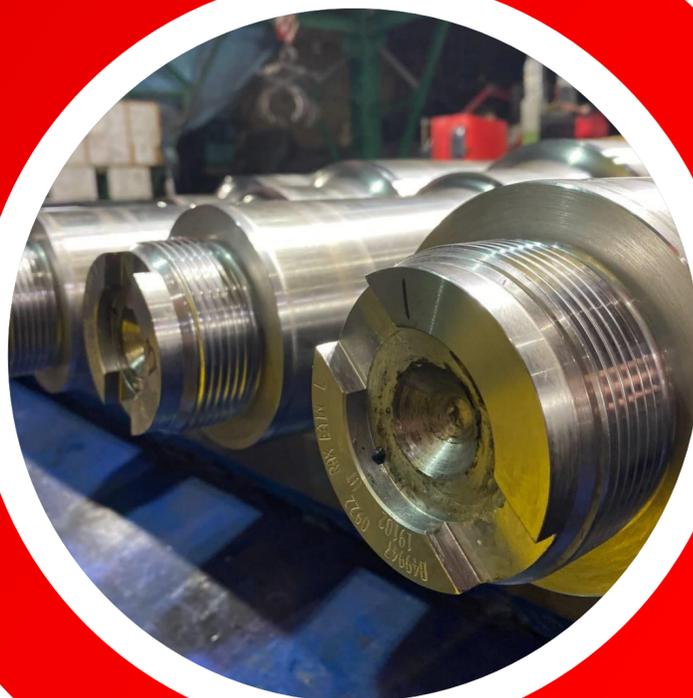

ASSORTMENT AND PRODUCTION POSSIBILITIES

The products of our company are interesting and profitable both for manufacturers of new wheelsets and for enterprises specializing in wheel set repair. We produce both finished axles and semi-finished axles with varying degrees of machining, which is most convenient to the technological line of the Customer.

At present, DDAP-RAX has orders from the European Union for finishing axles of freight and passenger cars for mainline railways, as well as for axles for locomotives and special rolling stock.

Also, DDAP-RAX continuously produces finished and semi-finished wagon and locomotive axles for private companies in Ukraine and Ukrzaliznytsia JSC.

Currently, the production capacity of the company enables it to produce 500-600 pcs of finishing axles of various types per month for the EU market, such as BA002, BA302, BA409, BA188, BA088, etc.

TECHNOLOGICAL EQUIPMENT

DDAP-RAX LLC has a complete set of its own machine equipment for complete machining of axial workpieces: cutting and centring, roughing, finishing on CNC machines, processing of axle ends, surface hardening (if necessary), grinding of required surfaces

HUMAN RESOURCES

The company employs a full staff including process engineers, adjusters, designers, highly skilled machinists, technical control specialists, equipment maintenance service, as well as employees from marketing, production support, HR, financial and economic, accounting departments. The presence of highly qualified staff with experience in their fields of 10-30 years allows us to carry out orders of any complexity - from the development of drawing and technical documentation to the production of finished axle products of a very wide configuration.

QUALITY CONTROL

The company has a complete set of its own equipment, measuring devices for quality control of the manufactured products: incoming inspection of roughing axle, intermediate inspection at all stages of axles processing, control of geometry, surface quality, magnetic particle and ultrasonic testing, marking and packing.

Axle identification and traceability at all stages of the production process is provided by the OSI software package, into which data for each operation are entered. The database includes: axis sequence number, heat number, chemical composition, test results, executor account numbers, shipment date and customer coordinates.

This, together with the highly skilled technical control department, allows us to deliver products that are completely free from defects.

CERTIFICATES

DDAP-RAX products are certified in Ukraine, USA, Canada and Europe. The company has a full set of certificates such as ISO 9001, AAR M-1003, TSI. Regular internal audits of QMS are carried out to continuously improve our activities and prevent any deficiencies. The quality of our QMS products is confirmed by the French AFNOR Certification "AFAQ". and products by Výzkumný Ústav Železniční, a. s.

LOGISTICS AND DELIVERY GEOGRAPHY

Our head office and production workshops are located in Kamianske (Dnepropetrovsk region, Ukraine). Our central location in Ukraine enables us to efficiently arrange delivery of our products to all parts of the world as well as to promptly receive our blanks. One of the largest railway junctions in Ukraine is situated in close proximity to our enterprise. The company has valid contracts with more than 5 trucking companies. We work with forwarding teams of professionals in major Ukrainian ports of the Black Sea, and currently in the ports of Gdańsk, Gdynia, Klaipeda and others. Our company guarantees timely and safe delivery by sea and road transport to any point in Europe

WORKING UNDER WARTIME CONDITIONS

The company is located in Dnipropetrovsk region, one of the key industrial regions of Ukraine and a strategically important military and transport hub.

At present, the nearest front line is at least 150 km from the location of the company's production facilities, which enables stable operation and shipment of products to customers. There are currently no hostilities in the region.

The company has diversified suppliers of blanks with which it has long-term relations: "Kamet-Steel" PJCS, Kamianske; "Dneprospetsstal" JCS, Zaporozhye; "Factory of heavy drill pipes and leading pipes" SE, Sumy. This allows RAX to receive rough axles in a smooth and timely manner and to meet its obligations to customers.

|

In spite of military operations in 2022-2023 RAX products are supplied to Canada (RONSCO), Romania (Meximpex SRL), Italy (GLEISFREI S.r.l.) and other countries of the European Union.

The owner of the company has a charitable foundation that provides assistance to the armed forces and the population in the war-affected areas with food, vehicles, machinery, medicines and equipment.

ADVANTAGES OF COOPERATION

01

high quality products

02

individual approach to the customer

03

prompt communication

04

competitive prices and conditions

05

comprehensive engineering and production capabilities

06

short manufacturing and delivery times

07

possibility of manufacturing axles of various sizes (10-600 pcs.)

08

possibility to track the order at all its stages via the client's cabinet.
